

Growth Predictor Rankings

Identify companies with certified growth

Problem we Solve

Lenders and investors have difficulty in **certifying** the **future revenue** of businesses in rapidly changing and uncertain markets, and therefore carry significantly increased risk in identifying and pursuing opportunities.

Our innovation-award-winning technology enables you to rapidly **predict opportunity by identifying and certifying growth companies**. Rankings are based on company Growth Predictor Scores. These are derived from new data that predicts and certifies the **Future Revenue** of a business by measuring its ability to innovate and grow in rapidly changing markets.

Predictive Data

The technology is an innovation in distinguishing companies on the basis of their growth credentials and certified future revenue. It has been designed to benefit both principal businesses and their clients by quickly assessing interconnected risk and opportunity in the context of changing markets, by providing a reliable future perspective that expands on existing company data.

Sustainability of Current Revenue

Based on new market intelligence from customers on a company's ability to keep pace with their changing needs and expectations.

Capability to Generate Future Revenue

Based on the collective ability of the leaders and teams in a business to *Adapt, Innovate, and Execute* new relevant value.

Growth Predictor Data

Generated for each participating company, contains the unique actionable insights behind their Score needed to avert risk and lift future revenue.

Relevant predictive data is provided to principals on a separate platform.

Unique Solution

Growth Predictor technology offers the following benefits to principals:

- **Predictive Data:** Identifies unseen risks and opportunities in client businesses in advance of results.
- **Rankings:** Enable you to build your next generation of certified growth companies on your Growth Predictor Ranking system.
- **Client Growth Solution:** Stimulates growth in client businesses through their predictive data.
- **New Clients:** Each time a client business deploys the technology, it engages a significant number of participating customers who are also invited to use it. This process continues through supply chains, exposing potentially thousands of non-principal clients to your business and your Growth Predictor Ranking system.
